

## PRODUCT INFORMATION

# G DATA ANTIVIRUS FOR MAC OS X™

COMPREHENSIVE INSTANT PROTECTION AGAINST VIRUSES,  
TROJANS AND OTHER MALWARE FOR YOUR MAC®

G DATA ANTIVIRUS FOR MAC offers special protection against viruses and phishing attempts for your Mac running OS X. Not only does it proactively protect against Mac viruses, it also provides additional protection for your Windows PCs that are connected to your network.

These heterogeneous networks consisting of Windows and Mac devices are also appearing increasingly often in households. Integrated phishing protection also blocks websites that try to spy on data.

### About G DATA

G DATA has been carrying out research for 25 years for your security. The result is exceptional, comprehensive protection for your PC, which is easy to install, simple to operate and offers excellent performance levels.

That's **GERMAN SICHERHEIT.**

## INSTANT PROTECTION FOR YOUR MAC

<b>Award-winning protection</b>	Against all viruses; even those that are no threat to your Mac but pose a threat to the Windows PCs in the network
<b>Phishing protection</b>	Fends off spy attacks on the Internet. Your bank data and credit card information are protected from being spied on
<b>Network protection</b>	Detection of threats that use your Mac as a gateway to your Windows devices. Your network stays protected
<b>Scheduled scans</b>	Create scheduled scans and thus keep your system permanently free from viruses. You can run the virus scan when you are not using the device
<b>Regular virus signature updates</b>	Always perfectly protected – even against the latest threats
<b>Customizable security</b>	Customize scans for removable media, processes or system folders
<b>Free telephone support and service</b>	Our support team works in close cooperation with the development team, so they can offer you the best support directly and quickly

Includes a 12-month licence including virus signature updates and software updates.
