COMPREHENSIVE PROTECTION FOR YOUR ANDROID™ SMARTPHONE OR TABLET

Web- and phishing-protection	Protects against phishing attacks and websites containing malware. Stops even the most current threats using state-of-the-art cloud technology
Protection against dangerous apps	App-control checks the permission of apps and reveals intrusive spyware
Malware protection	Android malware is on the rise. Using the latest cloud technology, the Advanced-Scan of Internet Security for Android is always up-to-date
SMS- and call-filter	Prevent spam calls and SMS by adding the sender to a blacklist. Block whole number ranges with wildcards e.g. premium rate call lines
Protection against theft and device loss	Should your device get lost or stolen, locate, lock or wipe it easily via sms from any other phone
Lock on SIM change	Prevent usage of other SIM cards in your phone. Get notified when the SIM card is replaced
Password protected apps	Prevent app launch with a password. Thus stop traffic costs by locking video apps or prevent app purchases
Protected contacts	Move contacts to a protected area and lock them down with a password. All DATA, messages and call lists of these contacts are available to your eyes only
Intuitive interface	We revamped the user interface to make it more intuitive and allow configuration of features with a snap

Contains a 12-month-license including regular virus signature updates, software updates, version upgrades and cloud access.

System requirements

Mobile device (smartphone / tablet) running Android OS 2.1 and above, 14 MB free memory
